

FOR THE EAGLE.

A Collation of News from All Over the World.

A Feast of Political, Commercial and General Intelligence, Thoroughly Sifted for Eagle Readers.

Forty-five Fishing Boats Lost.

Reports of the damage done by the furious gale that raged over the western part of Ireland Monday last continue to be received. The loss on land was quite heavy, but more damage was done at sea. Many minor marine casualties are reported. The fishing fleet that was at work off Killybegs when the storm burst suffered greatly. The many Irish boats were the worst sufferers. A number of fishermen were washed from them and drowned. Many boats from Baltimore, County Cork, and forty-five of the Mann fleet are missing, and it is feared that they were drowned. While trying to outride the storm, and, thus disabled, filled and then sank. None of the fleet were ashore, but great quantities of wreckage have been washed up along the coast, which is accepted as proof that many vessels foundered. Much of the wreckage is such as would come from fishing boats.

TROOPS ORDERED OUT.

United States Soldiers Are Sent to Capture Hogans, the Train Stealer.

The strong hand of the National Government at last has been extended to check in its career the lawless mob which has seized a train of the Northern Pacific Railway at Butte, Mont., and started eastward. Col. Francis, who is in command of the Department of Dakota in the absence of Gen. Merritt, was instructed by telegram to use the United States troops to intercept the mob and restore the railroad's property. This action follows upon Attorney General Olney's telegram of instruction to United States Marshal Bede at St. Paul. It can no longer be denied that the movement now in progress throughout the West has assumed the character of a national emergency. As long as the numerous "armies" and other organizations conducted themselves in a peaceful and law-abiding fashion there was no disposition to interfere with them. But as the true character of the agitators is revealed by such acts as the seizure of trains and other lawless doings, it is made evident to the officers of the Government that they no longer can stop at a policy of non-interference.

UNCLE SAM TAKES A HAND.

Troops from Fort Keogh Capture "Gen." Hogan, the Train Stealer.

First blood in the march of the commonwealth warriors, Billings, Mont., Wednesday. Hogan's army repulsed an attack of United States marshals in an effort to recapture a stolen train. One man was killed and several were wounded. Later, at Forsyth, at 2 a. m., Thursday, Federal troops under command of Col. Fere captured the Montana army of the commonwealth. The army, 650 strong, had come in from the west at 10:45 o'clock Wednesday evening. Its leaders gave it out that the train would remain at Forsyth until morning. At 11:30, however, the engine went to the round-house and deliberately proceeded to take out a fresh engine and prepare for the trip eastward. In the meantime Col. Page, of Fort Keogh, had secured a special train and was thundering down the road to meet the train-stealing contingent. He came into Forsyth shortly after midnight and found a large part of the Coxy army asleep in the box cars. The troops left most of the men aboard the train and surrounded it. Nothing definite is known as to what will be done with the commonwealthers.

ATROCIOUS TO PRISONERS.

Decapitation and Barbarism Practiced by Both Sides at Panama.

Dispatches from Rivera give details of alleged atrocious treatment of prisoners taken by Gen. Hipolito after his victories in Rio Grande do Sul. It is charged that they were decapitated. A newspaper published in Livramento asserts that when a sister of Carlos Lust, a 12-year-old drummer boy for the rebels, pleaded that his life might be spared, his head was struck off in her presence. Decapitation of prisoners is said to have been carried on by both sides at Panama.

COMPROMISE TARIFF BILL.

Senator Bruce Says It Has Been Agreed On and Will Be Passed in June.

Senator Bruce is authority for the statement that a compromise tariff bill has been agreed upon, which is reasonably certain to be adopted by Congress early in June. It will take the form of Senate committee amendments to the pending bill. Senator Bruce would not indicate any of the changes he has made or effect further than that it is in the line to secure a reduction of about 30 per cent from the McKinley law.

The Indiana Ticket.

Indiana Republicans, in convention at Indianapolis, were 1,715 strong and the proceedings were characterized by the most generous enthusiasm. Ex-President Harrison was there, and his speech upon the rostrum and his speech to the delegates were received with cheers that made the convention hall resound as it has not since he appeared in it in 1888. The following tickets were nominated:

For Governor, W. D. Owen.
For Auditor, C. A. Dwyer.
For Treasurer, J. P. Scholz.
For Attorney General, J. M. Gearing.
For Sup. of Public Instruction, D. M. Gearing.

Bribery Charged.

The jury in the Indianapolis National Bank case was locked up by order of Judge Baker. Attempts at bribery were reported, and one arrest made.

Killed by a Priest.

Mary Gilmarin, a clerk employed by the Pulvermacher Belt Company, in Cincinnati, was shot and killed while on her way to her work. The murderer gave the name of George Reed, but letters found on him prove that he is Father Dominic O'Grady, a Catholic priest who came from Ireland.

Desperate Criminals at Large.

The two Hicks brothers, in jail at Sturgis, S. D., for the murder of the cattleman, Myers, beat the jailer nearly to death and escaped. A reward of \$500 is offered for their arrest.

Miss Morse Asks for Damages.

Gertrude Morse, daughter of Professor Morse, of Hanover, has entered suit at Madison, Ind., for \$10,000 damages for breach of marriage contract against Paul R. Scarff, of Huntington, Iowa, a student at the college. Scarff is a member of the senior class, stands high socially, and is wealthy, talented, and brilliant.

Deadly Duel on the Street.

J. J. Morgan and James Mason, merchants at Fayetteville, Ark., quarreled on the streets and began firing at each other. Over a dozen shots were exchanged. Both men received wounds which will prove fatal. The trouble originated over business rivalry.

READY TO OUST HIM.

Democratic Senators Preparing to Read Him Out of the Party.

A Washington dispatch says that Senator Hill is to be officially read out of the party. Such at least is the intention of the tariff reformers of the Senate. The method proposed is to call a caucus of the Democratic Senators and by a vote declare that Senator Hill's recent speech shows that he is not in sympathy with the Democratic party on its most vital issue, the tariff, that his position endangers the party's very life, and that, therefore, he must go. Prior to that speech he was held in suspicion by the tariff reformers; since then the antagonism has been open. It is held by most of the radical tariff reformers that he has placed himself outside the party. The assumption is that he will not vote for the tariff bill, and the purpose is as soon as this fact is positively settled to hold a caucus and declare that his position is un-Democratic, and that he cannot be recognized as a Democrat in the organization of the Senate, and cannot be permitted to participate in the party caucuses.

FIVE MEN ARE KILLED.

Race War in Louisiana Promises Still More Shedding of Blood.

Four negroes have already paid the penalty for the brutal assassination of Manager Boyce, of the Bannock plantation, in Madison Parish, La., and it is not unlikely that several more will have summary justice dealt out to them. Madison Parish is torn wide open with excitement. One of the negroes implicated in the assassination of Boyce was shot on Saturday after being caught. Judge Lynch held high carnival here last night at Tallulah. A mob gathered in front of the jail, held a conference, and decided upon the guilt of three men incarcerated there. Then the mob went deliberately to work, and with a butting-iron, broke open the door of the jail and forced open the door. Jim Slaughter, Tom Clanton, and Dave Hawkins were led out and swung up to the balcony of the court house. Their bodies were hanging there in the morning. Clanton and his four pals are still in the swamp. It seems certain that they will be lynched.

COKEY GETS WARNING.

The Government Will Stand No Nonsense from Commonwealers.

A proclamation was issued Monday afternoon by the commissioners of the District of Columbia warning Coxy's men and the entire army of the discontented that it is useless to go to Washington, as there is no work there, and Congress cannot be forced to make laws by their physical presence. This proclamation means much more than appears upon the surface. It was not issued until after a prolonged interview with the President, his Cabinet, the Chief of the metropolitan police. It indicates clearly what the attitude of the President is to be in the event that Coxy's army or any other shall attempt to violate the laws of the District. There can be no question that if the District authorities shall not be able to keep the law and preserve the peace the President will come to their aid with the force at his disposal. The city of Washington will be protected and Congress will not be intimidated.

Will Use the Big Light.

One of the great searchlights which illuminated millions during the night illuminations at the World's Fair last summer has been taken to Cleveland, Ohio. It is being placed on the new steamship Northwest, of the Great Northern Line. Its lens is thirty-six inches in diameter, and the light has a 10,000-candle power. The light will form one of the novel features of the Northwest, and passengers will be able to see a grand deal of scenery by night as well as by day.

The National Game.

The clubs of the National League stand as follows in the championship race:

as follows in the championship race:							
	W.	L.	Per		W.	L.	Per
Baltimore...	4	0	100	Louisville...	2	2	50
Philadelphia...	4	1	80	Washington...	2	2	50
Boston...	3	1	75	Pittsburgh...	1	3	25
Cleveland...	3	1	75	Brooklyn...	0	4	0
Cincinnati...	3	1	75	Chicago...	0	4	0
St. Louis...	3	1	75	New York...	0	4	0

Shocking Accident at a Funeral.

While the procession following George Stuckey's remains was en route to the Borneo Cemetery, near Decatur, Ind., a passing team became frightened and ran away. This started others, and before the affair ended three teams and eleven people were killed in the road. Mrs. Frank Warner was instantly killed and three others received wounds that will result fatally.

Father of Waters at Flood Tide.

At the rate the Mississippi is rising at Alton, Minn., a flood is inevitable. All logjams in tributary streams will be open very soon. The water is rising so fast that they will be compelled to open or blow out. The Douglas Dam on Sandy River at McGregor gave way and the Northern Pacific Railroad bridge there is in danger.

Corpses Shut Down a Mine.

The bodies of John Keefe Jr., who was killed under a surface fall at Bowery mine, near Frostburg, Md., April 7, was found Thursday morning after incessant work day and night since the accident.

Fry's Army Vaccinated.

At Terre Haute, Ind., the County Board of Health vaccinated every one of Fry's band of Coxyites.

Van Leuven Trial Date Set.

Judge Shiras at Dubuque, Iowa, fixed Dec. 11 as the date for trial of the Van Leuven peon case.

IT WAS A CLOSE SHAVE.

But the Disheveled Captain at Last Made Terms with His Wife.

Capt. Chauncey, retired of Brooklyn, had his beard shaved off last week in New York, and many men have lost heads in the same way before, says the New York Sun. Capt. Chauncey, however, will never do it again. As the barber was using his shears, he said:

"Haf you a fembly?"

"Yes," said the Captain, "a wife and two children."

"Since ven was your viskers shaved alretty?"

"Not for twenty years."

"So," murmured the barber, "Vell, all I god to say las dot you're fembly vnot know you yet. Dot's all."

Capt. Chauncey's beard had parted artistically and was by no means ordinary. It was paying the barber for his work and his comments, Capt. Chauncey stopped in to see a friend on business.

"Good morning, Blank," he said, "have you sent that check to —"

"What check, sir? Wh-a-a-t! Chauncey! The devil!"

This was discouraging, but Mr. Blank made it all right by saying:

"Chauncey, old man, pardon my surprise, but I never have seen you without a beard. Really it makes you look ten years younger. It does for a fact."

Capt. Chauncey left New York to face his wife and children with a lack of confidence. He fingered his latch key nervously, and wondered if the hall lights were burning low. Before he had shed his overcoat Mrs. Chauncey was there to greet him with a kiss. She turned up her face for the usual greeting. Her eyes met the Captain's and then dropped to his smoothly shaven chin.

"Oh, Chauncey, how could you do it? How could you? Oh, said Mrs. Chauncey drawing back.

"It was a barber, my dear," said the Captain, remembering now what the barber had said about his beard and his "fembly."

"But, Chauncey, how dreadful. I will have to get used to you by degrees. Don't stand in that strong light, my dear. Oh, it's too dreadful, and what will the girls say? Chauncey, they must see most admiration when, near the horizon, he coronates with rainbow hues. But the astronomer would be glad if he could put a stop to the scintillation of the stars. That unsteadiness of their light is one of the chief obstacles he has to overcome in studying them with the telescope.

Scintillation has generally been regarded as due only to slight disturbances in the atmosphere. But as recent observations have shown that the stars scintillate less when white ones, it has been suggested that the causes of some of the essential differences in the scintillations of different stars may be in the stars themselves. There is no doubt, however, that the main cause of scintillation depends upon the condition of the air.

Most people suppose that when the stars appear to lose their liveliness of light, and shine without twinkling as mildred bright points in the sky, fair weather is in prospect. Studies lately made in France and Switzerland seem to contradict this popular belief. It has been found there that when the stars are feeble in their scintillations foul weather is at hand. The night before a most violent storm in France, for instance, the stars hung so quietly in the sky that they seemed to have entirely lost the scintillation power.

This is said to be only one instance, among many which show that an unusual steadiness in the light of the stars precedes the appearance of storms.

Beset with Danger.

Amateur photographers do not thrive in Russia. The fascinating pursuit is beset with many difficulties. In the first place, it is necessary to communicate with the police and obtain a license. This having been accomplished, the photographer is advised to be very careful where he or she is seen photographing. If one happens to be in proximity to a fortress when discovered by the Secret Intelligence Department, he stands a chance of being dispatched on a free excursion to Siberia, where return tickets are not supplied. Of every picture made a copy must be sent to the police authorities and another must be filed by the photographer for reference. The police have also the right at any time of the day or night to enter your dark room and examine everything therein, and to search all of your photographic paraphernalia. Nor is this all the unfortunate amateur has to put up with. All of his dry plates have to be imported—as they are not manufactured in Russia—and each box is opened and every plate examined. It is a wonder they do not immerse each one in a developer, and to ascertain if there are any nihilistic communications latent in the film. Poor, suffering amateur photographers!

Whitewashing Buildings.

Farmers could very profitably use the whitewash brush a great deal more than they do. The poultry houses, pig pens, and outbuildings of all kinds, garden fence, and the inner portion of the stables would all be benefited by the frequent use of whitewash. Here is a receipt for the wash used by the light house board of the Treasury Department of the United States, which is probably one of the best known for outside work. Slack one-half bushel of good, clear stone lime in boiling water, keeping the lime covered during the process. Strain the slacked lime and add one-half peck of salt previously dissolved in warm water; three pounds of good rice which has been boiled to a thin paste, one-half pound of Spanish whiting, and one of clear white glue, dissolved in hot water, mix all together and let it stand for several days. Keep in a kettle, and heat when used, applying the whitewash hot and with a painter's or whitewash brush, choosing a clear, dry day for the operation.

PEOPLE begin abusing a person as soon as he is born, and begin complimenting him as soon as he is dead.

WHEN a man gets in trouble the only thing his friends give him is advice.

received \$20,000 for the work from one publisher alone.

Graceland Flattery.

The Tulleries garden was made for Louis XIV. French landscape gardeners, Le Notre. One day the King expressed dissatisfaction with one of the main avenues of the garden. The next morning he was amazed to find the avenue just as he wanted it. The skilful and energetic gardener had changed the direction and plan of the avenue during the night.

A much more elaborate and ingenious tribute to the King's taste was paid by the Duke d'Antin, superintendent of the royal buildings. Louis once remarked impatiently that he hoped that some time a forest which he had always disliked, because it obstructed one of his favorite views, would be cut down.

No one knew better than the Duke d'Antin how to flatter the King. On this occasion he combined tact and skill. Unknown to the King he had the trunks of all the trees in the objectionable piece of forest sawed through near the ground in such a way that they still stood, though a slight pull would bring them down. He removed every evidence of the work, and fastened ropes to the tops of the trees, and concealed more than 1,200 men in the forest to manage the ropes at a signal from him.

The Duke knew on what day the King would walk in the wood, and planned his work accordingly. The King took his accustomed promenade, and as usual, he expressed his sentiment about the hated forest.

"Your Majesty, the forest shall be removed whenever you like," said d'Antin.

"Indeed," said the King, "then I wish that it might be done at once."

At that moment d'Antin blew a shrill blast from a whistle, and to the utter amazement of the King and the royal party, the forest fell as if by enchantment.

Stars and Storms.

Much of the beauty of the stars depends upon their scintillation. The multitudinous flashing of their tiny rays gives a wonderful life and brilliancy to the wintery night. The great Sirius excites the most admiration when, near the horizon, he coronates with rainbow hues. But the astronomer would be glad if he could put a stop to the scintillation of the stars. That unsteadiness of their light is one of the chief obstacles he has to overcome in studying them with the telescope.

Scintillation has generally been regarded as due only to slight disturbances in the atmosphere. But as recent observations have shown that the stars scintillate less when white ones, it has been suggested that the causes of some of the essential differences in the scintillations of different stars may be in the stars themselves. There is no doubt, however, that the main cause of scintillation depends upon the condition of the air.

Most people suppose that when the stars appear to lose their liveliness of light, and shine without twinkling as mildred bright points in the sky, fair weather is in prospect. Studies lately made in France and Switzerland seem to contradict this popular belief. It has been found there that when the stars are feeble in their scintillations foul weather is at hand. The night before a most violent storm in France, for instance, the stars hung so quietly in the sky that they seemed to have entirely lost the scintillation power.

This is said to be only one instance, among many which show that an unusual steadiness in the light of the stars precedes the appearance of storms.

Beset with Danger
